4	GENE	RAL RULES REGARDING CHARGES	2020/2021	2021/2022
		Should any dispute arise as to classification, the decision of the Council shall be final.		
		In cases where any charge is based upon numbers of persons or beds the heads of the institutions concerned shall furnish the Council with certified returns setting forth the information required for calculating such charges. Should any person or persons required to furnish any return in terms of these by-laws, fail to do so, within 30 days after having been called upon to do so by the Town Treasurer, the Council shall have the right to make charges under Parts 1 and/or 2 as in the circumstances appear to the Council to be reasonable. Should any building be occupied in sections during construction, any charges which apply in respect of such building shall be made as to 33 1/3 per cent during the first month of such occupation, 66 2/3 per cent during the second month and thereafter 100 per cent. All charges under Part 2 shall, in respect of premises already connected to the Council's sewers, apply from the first of the month following upon that during which connection has been made to the Council's sewers. Up to the date which these charges come into operation in respect of any premises, the sanitary and vacuum removal fees in force prior to that date shall be payable.		
		Any premises which have not yet been connected to the Council's sewers shall be charged under Part 2 from the date upon which the Council, by written notice, required the connection to be made or from the date upon which the connection is made, whichever is the earlier. Any premises not connected by the date upon which the Council required the connection to be made shall be charged the usual fees for sanitary, vacuum or slop-water services rendered in addition to the charges under Part 2		
		The minimum charge under Part 2 shall be per month.	R84.61	R89.69

Comments:

The revenue impact of the recommended tariffs, shown in the figure above, only consider the municipality's income due to electricity sales. SSEG may have a further positive socio-economic impact on the local economy.

The introduction of a demand charge to the small business category, the increase in fixed charges to industrial high tension category, and the increase in energy charges have been developed to reduce the impact of SSEG installation on revenue due to drop in consumption.

The export tarriff has been developed to assist SSEG to realise short period payback time and to reduce purchase cost to the municaplity when municpality buys excess generated electricity at cheaper price from SSEG customers.

A Cost of Supply study is needed to determine how cost-reflective the above tariffs are, and these tariffs should be considered interim until a detailed Cost of Supply has confirmed that costs plus a fair margin, as allowed by the regulator, is being recovered.
